PRODUCT DESCRIPTION

Designer: Davide Groppi

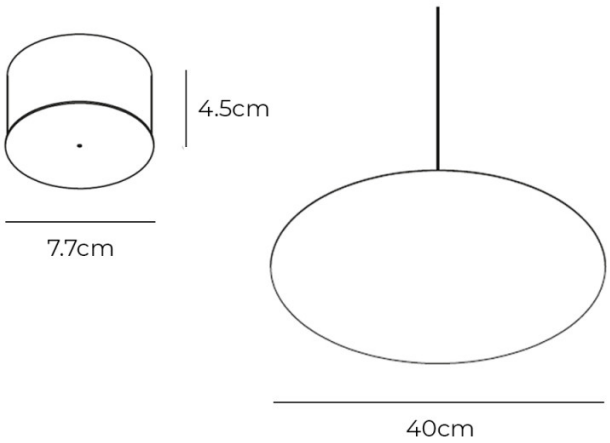

Davide Groppi Asintoto LED Pendant

Designed and manufactured by Davide Groppi, the Asintoto LED Pendant is the definition of minimalism. This lighting solution consists of a circular head, fitted with LED technology to produce a non-invasive and unique indirect illumination that is shone towards the ceiling. This uplight creates an elegant and welcoming atmosphere, and when the luminaire is turned off, it becomes the perfect symbol of the absence of light, a subtle black hole. Asintoto also allows you to choose your colour temperature, allowing you to pick between 2700K (warm white) and 3000K (warmest white) depending on which best suits your needs.

The black-painted metal structure is contemporary, adding an elegantly refined touch to your space. It can be displayed as a singular form or grouped in multiples for larger commercial spaces. This pendant light is a subtle addition to kitchens, dining spaces, hotel lobbies and numerous spaces in the hospitality sector. Asintoto is supplied as Triac dimming as standard, but other systems are available upon request.

PRODUCT SPECIFICATION
