PRODUCT DESCRIPTION

Designer: Lukas Bazle

New Works Nebra Pendant

Designed by Lukas Bazel for New Works, the Nebra LED Pendant is a unique and eye-catching lighting solution that encourages user interaction. Taking inspiration from traditional Japanese design, Bazel created a pendant light with a classic pleated conical shade, but with a twist. This shade features an interactive, transformative mechanism - users become the choreographers, shaping the lamp's formation and the very quality of light with just a simple sweeping motion. Nebra offers a variety of lighting moods and provides an overall ambient glow, resulting in a calming and inviting atmosphere.

The New Works Nebra Pendant is a celebration of the ebb and flow of daily life, combining both traditional and contemporary design. Display Nebra individually or in groups depending on your interior size and style, this luminaire is a stylish addition to bedrooms, dining spaces and living rooms. It can also be a dynamic way to illuminate larger commercial spaces such as hotels, restaurants, bars and reception areas.
