PRODUCT DESCRIPTION

Designer: Simon Legald

Normann Copenhagen Cellu Table Lamp

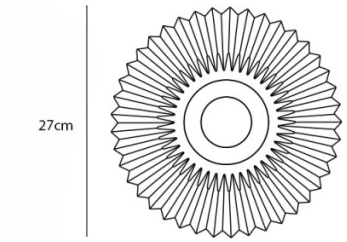

Normann Copenhagen Cellu Table Lamp was designed by Simon Legald in 2023. Cellu Lamp is a carefully crafted lighting solution that boasts durability and style. The lampshade is made from high-quality PVC material that is known for its strength and longevity. Cellus' lampshade is precisely positioned on a robust powder-coated aluminium column that provides the necessary support for the lampshade to stay in place. Its sturdy base has a sleek and contemporary look that enhances the overall aesthetics of the lamp.

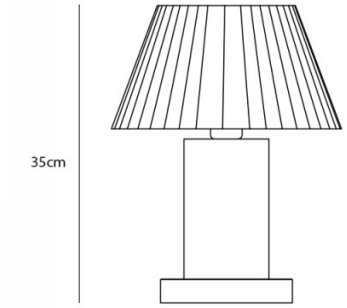

The Cellu Table Lamp is a beautiful design which is ideal for adding a touch of minimalistic illumination to any space. It is perfect for both home and commercial use and can be used in a variety of settings such as bedrooms, living rooms, offices, and restaurants. The Cellu Table Lamp is not only functional but also stylish, making it an excellent choice for those who value both form and function. The white-structured Cellu table Lamp has three different coloured bases, including brown, blue and green, while the cream structure only has a red base. Cellu is also available in a floor lamp version.

Please note: this product is supplied with a hardwired cable and plug. This is not a battery-powered, portable lamp.
