PRODUCT DESCRIPTION

Designer: ByMars

AGO Cirkus Chandelier

The AGO Cirkus Chandelier combines functionality with adaptability, utilising an aluminium structure with curved diffusers that appear to be floating. Designed by BYMARS, the Cirkus Chandelier is a playful lighting solution that is available in two sizes and four colours, it provides a directional illumination that can be focused either upwards or downwards by moving the u-shaped modules. You are even able to combine the two, creating a suspended light that resembles waves.

The AGO Cirkus consists of soft angles and geometric shapes, generating a perfect blend of Korean and Scandinavian design. The playful finishes add a touch of humour to any contemporary interior and are a guaranteed eye-catcher. For this reason, the luminaire makes an exceptional centrepiece over dining tables, kitchen islands, countertops and reception areas.
