PRODUCT DESCRIPTION

Designer: Tala Lighting

Tala Voronoi II Nine Pendant

The Tala Voronoi II Nine Pendant is the largest in the collection and generates an abundance of warm and inviting illumination thanks to its nine light sources. These bulbs are crafted from mouth-blown borosilicate glass, with an intricate LED filament that appears to effortlessly wrap around the core. Designed to create maximum impact with less fuss, the Nine Pendant is an all-in-one lighting solution for almost any modern interior. The design team drew inspiration from nature, creating an elegant and decorative lighting installation.

The Voronoi II bulbs form an abstract droplet shape, adding a touch of sculptural drama to your interior. Thanks to the size of the Voronoi II Nine Pendant it is a beautiful addition to stairwells and larger interiors in the hospitality sector such as restaurants, hotel lobbies, bars, libraries and galleries. It offers four colour options for the pendant fixtures: Brass, Graphite, Oak or Walnut - with the graphite utilising a black canopy and the rest a white canopy.
