PRODUCT DESCRIPTION

Designer: Boris Klimek

Brokis Convex LED Pendant Light

The Brokis Convex LED Pendant Light, designed by Boris Klimek, is a striking fusion of innovation and craftsmanship. Crafted from Brokisglass, an upcycled crushed glass material, this pendant features a unique convex lens shape that enhances light diffusion beautifully. The minimalist metal body and suspension system provide a sleek, contemporary frame, allowing the glass shade to take centre stage. Available in two sizes with a range of finishes, the Convex Pendant offers high output illumination with integrated LED modules.

With a warm 2700K LED with a high CRI of 90+, offering vivid, natural colour rendering. Dimmable via mains phase, this pendant is ideal for kitchens, dining areas, living rooms, entryways, and commercial spaces such as hospitality and retail. The bayonet connection system simplifies installation and maintenance, making the Convex Pendant as practical as it is beautiful.
