PRODUCT DESCRIPTION

Designer: Marco Spatti

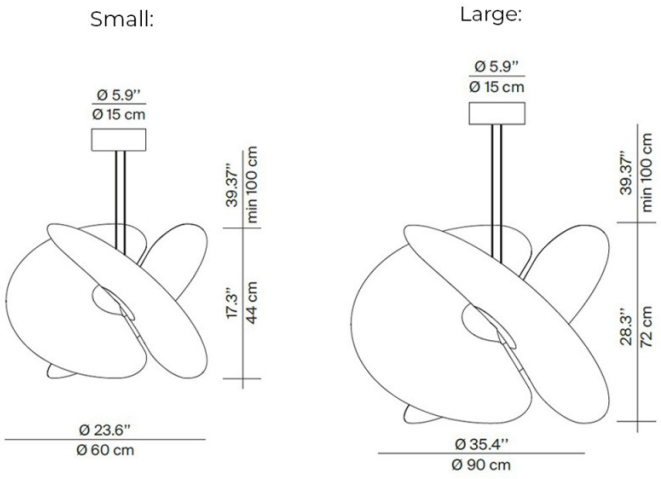

Luceplan Levante LED Suspension

Designed by Marco Spatti for Luceplan, the Levante LED Suspension is an elegant contemporary lighting solution that is sure to make a statement. Boasting a unique silhouette, the luminaire consists of three fabric diffusers which are connected via a magnet to the central aluminium structure. These diffusers are crafted from a material that resembles rice paper, and Spatti found his inspiration from Japanese paper fans. Levante is designed to appear to float in mid-air, with its light source concealed it produces a decorative ambient glow which is evenly diffused through the shades.

Available in two sizes, the Luceplan Levante Suspension can be displayed individually or in multiples of varying sizes for larger interiors. This light is an elegant solution for both residential and commercial spaces and its contemporary form makes a beautiful adornment in foyers, entryways, lobbies, stairwells and large dining or living areas. A graceful way to illuminate hotels, restaurants, bars and private residential properties.
