PRODUCT DESCRIPTION

Designer: Space Copenhagen

&Tradition Bonnet Chandelier

The Bonnet Chandelier was designed by Space Copenhagen for &Tradition and released in 2024. The minimalistic silhouette features slender metal arms that hold curved shades enveloping the light source, and framing and guiding the diffused light with precision. The shades can be directed downwards for a more direct luminance or faced towards the ceiling to generate indirect and reflected illumination.

Bonnet harbours exquisite attention to detail, is available in three stem lengths depending on your ceiling height and provides a diffused even glow. The design of this luminaire is the definition of elegance and minimalism, providing a statement piece for a range of environments without having to sacrifice high-quality illumination. This chandelier is a beautiful addition to living rooms, dining spaces and even kitchens.
