## PRODUCT DESCRIPTION

**Designer:** Stefan Diez

### Vibia Plusminus Solo LED Ceiling / Wall Light

The Vibia Plusminus Solo is a 2024 addition and evolution of the lighting system. The semi-spherical surface-mounted ceiling/wall lights are available in three sizes and a range of finishes, each light provides a comfortable general illumination that is filtered through the polycarbonate diffuser.

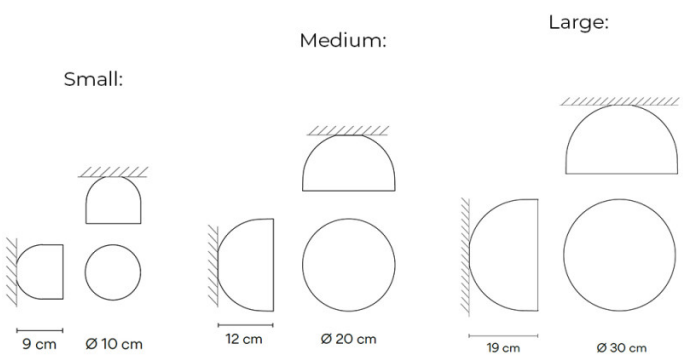

The Plusminus Solo LED Ceiling/Wall Light harnesses an adjustable structure, fitted to the ceiling or wall by a back plate, the semi-sphere can be manoeuvred on the base to adjust the angle - therefore allowing the user to direct the illumination to wherever it is needed most. The contemporary design of the Plusminus Solo allows each variation to adapt to a vast range of interiors, they can be displayed individually or in configurations of multiples, varying in sizes, finishes and lighting direction. This functional but minimalistic lighting solution is a beautiful addition to hallways, kitchens and dining spaces.

**The Vibia Plusminus LED Ceiling/Wall Light is supplied with a colour temperature of 3000K as standard, but can also be supplied with either a 2700K or 3500K temperature upon request. Please contact us for more information and pricing.**

**Please Note: This product uses a remote driver that will need to be housed in the ceiling or wall.**
