PRODUCT DESCRIPTION

Designer: Arik Levy

Vibia Sticks Solo LED Suspension

The Sticks Solo Suspension is an architectural design by Arik Levy, featuring a minimalistic structure fitted with LED technology and suspended by narrow wires. The structure is easily rotated the direct the illumination wherever it is needed, this transforms the Sticks Solo from a focused and direct downlight to a more ambient indirect uplight.

The Sticks Solo Suspension incorporates a range of electrical connection options for seamless integration with the surrounding architecture. It is available in three variations, a small and medium which feature one linear structure, or a double which features two. This luminaire is a stylish addition to contemporary interiors and is an excellent way to brighten up kitchens, dining rooms and workspaces. Due to its configuration abilities Sticks Solo can also make a statement in commercial interiors.

The Vibia Sticks Solo LED Suspension can also be supplied with a 2700K colour temperature, and with Dali dimming. Please contact us for more information and pricing.
