PRODUCT DESCRIPTION

Designer: Jamie Wolfond

Moooi Drape Light LED Suspension

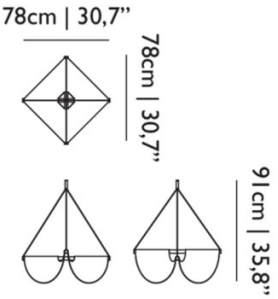

Designed by Jamie Woldfond, the Moooi Drape Light Suspension combines light and shade to create a captivating and functional luminaire. The name of this light stems from the silhouette, utilising sheets of 3D-knitted polyester fabric draped across slender glass tubes that are fitted with LED technology. Working with gravity, the organic shade sits on the light source to create a striking, ephemeral, sculptural form.

Drape Light is innovative and elegant, creating a focal point no matter where it is displayed, whilst also generating a cosy ambience. Available in two sizes (either 78 or 118), this contemporary luminaire can adapt to an array of interiors, for both residential and commercial spaces and can be displayed individually or in multiples. A beautiful way to illuminate dining tables, workspaces, kitchen islands, reception areas and entryways.
