PRODUCT DESCRIPTION

Designer: Zoe Stark

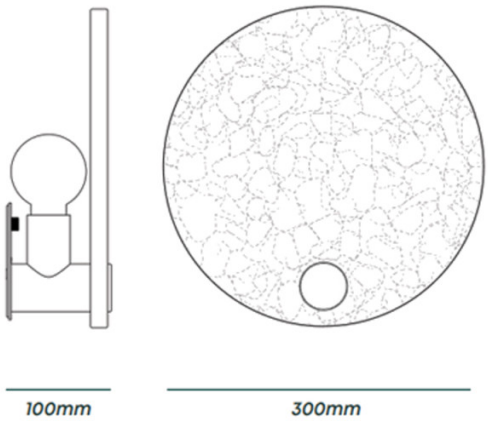

Tala Magma Wall Light

Designed by Zoe Stark to embody the beauty of circular materials, the Tala Magma Wall Light combines sophisticated design with Tala's commitment to sustainability. Featuring a decorative diffuser disc made from 100% recycled glass, a sustainable alternative to alabaster, this light offers a subtle yet striking aesthetic. The solid brass frame adds a luxurious touch, while the G70 Dim to Warm bulb provides a soft, diffused glow that’s ideal for both residential and commercial environments. The unique optical qualities of the glass, produced from upcycled solar panels, contribute to the light’s gentle diffusion, perfect for creating ambient lighting.

With its surface-mounted design, the Magma Wall Light projects only 10cm from the wall, making it suitable for a wide variety of spaces, from hallways to living areas. This fixture offers a sustainable lighting solution without compromising on style or performance.
