Bocci 14p Portable LED Lamp

Please Note: The Bocci 14p Portable can only be sold in packs of 8, at a cost of £1,888.

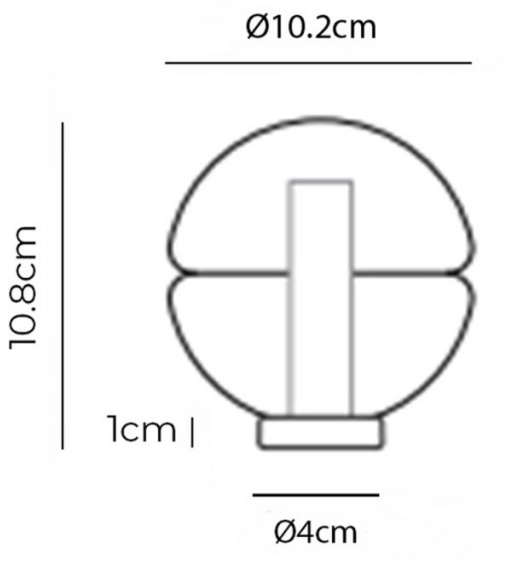

The Bocci 14p LED Portable Lamp, designed by Omer Arbel, reinterprets the original 14 Series as a compact, rechargeable light. Formed from two irregular cast-glass hemispheres, the portable lamp retains the textured equator and softly illuminated centre of the original design. Its cordless construction allows the light to be positioned individually or arranged in groups across a room.

The 14p is now available in Bocci's hand-applied Mirror finish. When fully illuminated, the glass appears clear, allowing light to pass through. As the brightness is reduced or the lamp is switched off, the mirrored surface becomes increasingly reflective. The Mirror version features a warm 2500K integrated LED and four brightness levels, while the standard glass finishes provide three adjustable brightness levels.

The 14p is rechargeable via USB-C and can be moved between settings without requiring a permanent power connection. The current version is IP55-rated, making it suitable for indoor and outdoor use. Its small proportions and soft, candle-like illumination make it particularly suited to bedside tables, dining tables, shelves, and decorative arrangements.

PRODUCT SPECIFICATION

Light Source:	**Standard:** 1W, 2500K, 110 Lumens **Mirror:** 0.3W, 2500K, 18 Lumens
IP Code:	20
Dimming:	Integrated dimmer on product.
Dimensions:	Diameter: 10.2cm Height: 10.8cm Base: Ø4cm
