PRODUCT DESCRIPTION

Designer: Omer Arbel

Bocci 100.1 LED Single Random Pendant

Designed by Omer Arbel, the Bocci 100.1 Single Random Pendant boasts a unique silhouette and an elegant aesthetic. Part of the Bocci 100 series, this luminaire is formed from glassblowers' work together to create a dynamic, interlocking glass formation. Each glass sphere is carefully shaped, with the final structure cut by a diamond saw to reveal intricate inner layers. The embedded LED source within the pendant interacts with the variable glass thicknesses, producing a soft, ambient glow that beautifully highlights the complexity of the design.

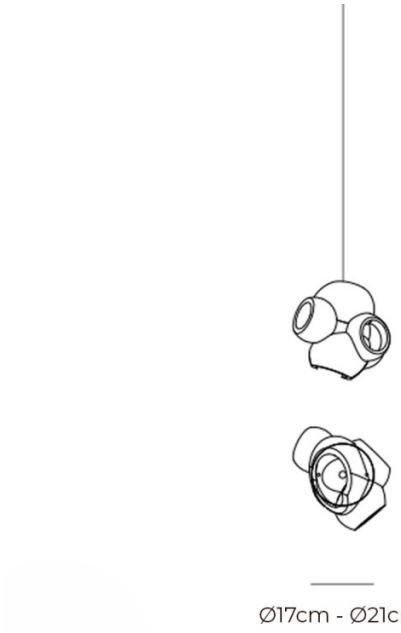

Suspended from a sleek canopy, the 100.1 pendants can be arranged as a stand-alone statement piece or combined in multiples for a dramatic installation. The pendant is available with a variety of canopy finishes, including white, black, and brushed nickel, and can be customised with different cable lengths to suit your space. Ideal for residential interiors or commercial environments, the Bocci 100.1 is a testament to the artistry of hand-blown glass and the unpredictable beauty that results from Bocci’s innovative process.

Please Note: The handcrafted nature of the Bocci 100.1 LED Single Random Pendant means that each piece will be unique and will vary in size and shape.

This pendant comes with a deep ceiling canopy, but is available with other ceiling canopy options: flush mini canopy and shallow canopy. Please contact us for more information or to purchase these options.
