Astro Borgo 54 LED Recessed Light

The Astro Borgo 54 LED Recessed Light is a compact recessed wall light with a clean, minimal form that suits both contemporary residential and commercial interiors. Designed for vertical wall installation, it provides a subtle downward wash of light that works particularly well as low-level accent lighting in corridors, staircases, bathrooms, and circulation spaces.

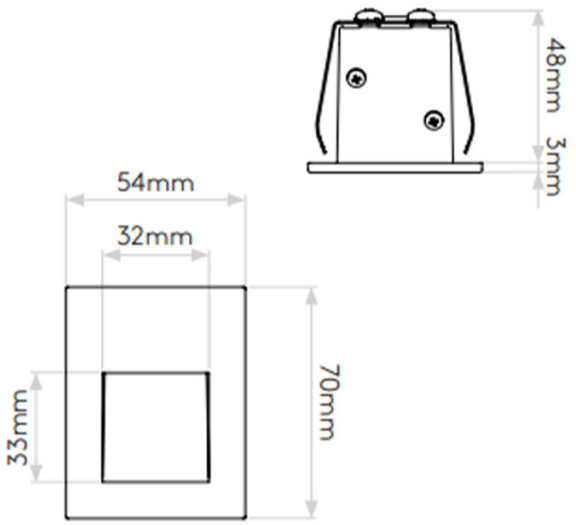

With an integrated 1W LED light source, Borgo 54 emits a warm 3000K glow and offers a neat architectural finish without drawing attention away from the surrounding space. Its IP65 rating makes it suitable for bathroom use in zones 1, 2 and 3, while the matt white finish helps it sit quietly within a wide range of interior schemes.

Borgo 54 requires a constant current 350mA driver and is dimmable when used with compatible control gear. An optional back box for solid wall installation is supplied with the fitting, making it a practical solution for projects that need discreet, durable and well-considered recessed lighting.

Please note: The Astro Borgo 54 requires a 700mA constant current driver, not included. Drivers differ depending on how many lights you want to install and whether you need them to be dimmable or not. Please contact us for more information and pricing
