PRODUCT DESCRIPTION

Designer: Space Copenhagen

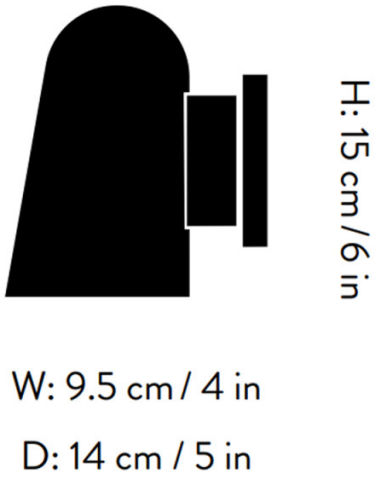

&Tradition Solid Wall Light

Designed by Space Copenhagen, the &Tradition Solid Wall Light embraces a minimal yet robust aesthetic inspired by maritime and industrial influences. The lamp's bell-shaped silhouette echoes the practical, durable forms of nautical lighting, making it an elegant yet functional addition to both indoor and outdoor spaces. Available in Black (painted aluminium), the Solid Wall Light is designed to withstand the elements while offering a warm, focused illumination.

With a clear-cut glass diffuser, the Solid Wall Light provides a directional, controlled glow, ideal for highlighting architectural details, illuminating hallways, or creating a guiding pathway in outdoor settings. The optional opal glass diffuser softens the light, allowing for a more diffused, ambient effect. The IP44 rating ensures its suitability for bathrooms, covered patios, and other damp environments. Whether used in a hospitality setting, private residence, or urban exterior, this understated yet striking wall lamp embodies durability, elegance, and functional beauty.
