Flos Superwire LED Table Lamp

This product is an Offline Only exclusive, available only to buy from selected authorised Flos dealers. Please contact us for pricing or to arrange an appointment to discuss this product in our showroom.

A modular lighting solution designed by Formafantasma with an exposed light source, the Flos Superwire LED Table Lamp is a functional and poetic creation which recalls the work of the great glass masters of the last century. The studio's inspiration was drawn from the timeless elegance of vintage lanterns and expertly combines clean lines and thoughtful design. The Superwire Table Lamp can be used in a variety of interiors and adds a contemporary touch to lounges, bedrooms, offices, entryways and numerous commercial spaces. This striking lighting solution seamlessly complements a plethora of interior fashions.

Made of planar glass and polished aluminium, the Superwire's design originated from the development of a custom-made light source that emits a warm illumination. These soft, flexible LED strips measure up to one meter and are projected out towards the room from a variety of angles, resulting in an even glow that can be easily personalised by the dimmer fitted on the cable. The unique LED strips can also be easily removed for replacement and repair.
