PRODUCT DESCRIPTION

Designer: Ferm Living

Ferm Living Collect High Socket Pendant Glass Sphere

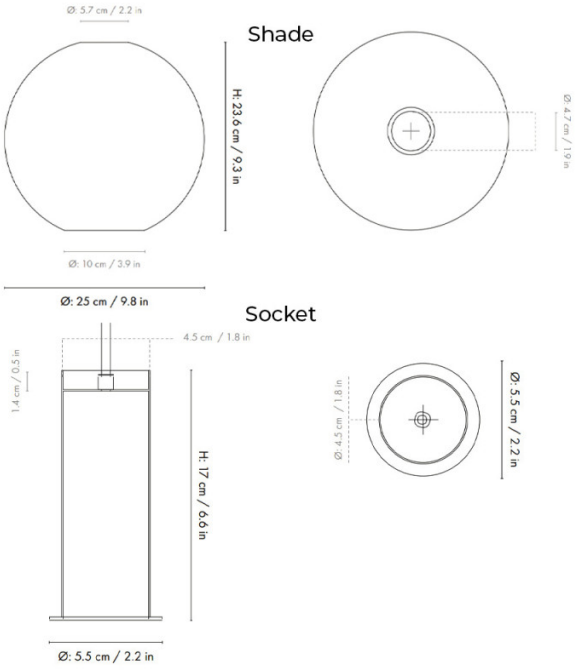

The Ferm Living Collect High Socket Pendant Glass Sphere is a contemporary lighting piece that offers both sculptural appeal and practical illumination. Designed as part of the modular Collect Lighting series, it features a beautifully rounded opal glass sphere that diffuses light softly, making it an ideal choice for intimate, ambient lighting.

With the high socket paired with the glass shade, this pendant is particularly suited for higher ceilings or spaces where a bold visual impact is desired. The structured contrast between the opal glass shade and the metal socket, available in multiple finishes, ensures versatility across a range of interior styles. Complete with a 3-metre fabric-covered cord, a coordinating ceiling canopy, and a decorative ring, this pendant light is an elegant solution for dining areas, hallways, and feature spaces.

Please note, this product is also available in a Low Socket version and a Bell Socket version.
