PRODUCT DESCRIPTION

Designer: Muller Van Severen

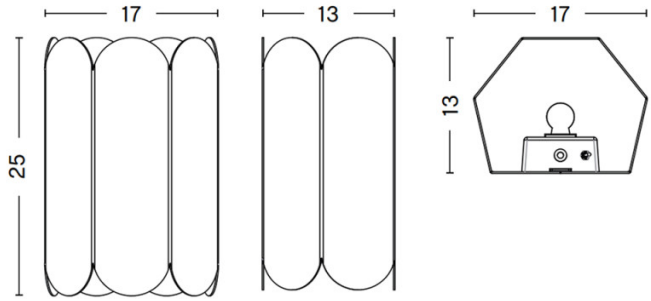

HAY Arcs Wall Light

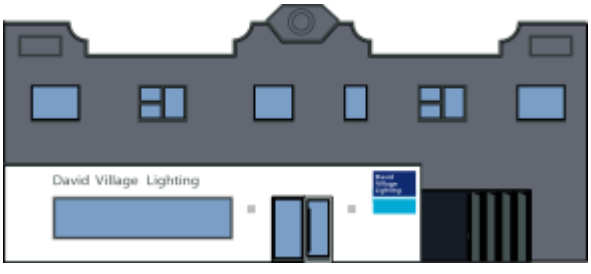

An eye-catching design by Belgian duo Muller Van Severen, the HAY Arcs Wall Light provides a soft, ambient up-and-down light that plays with shapes and shadows. Forming a continuous chain of curved arches, the Arcs Wall Light boasts an elegant scalloped silhouette and is available in four bold contemporary finishes. The hidden light source casts a warm glow along the wall, not only generating an inviting atmosphere but also creating an interesting lighting pattern along the surface.

The HAY Arcs Wall Light comes in two versions: either as a hardwired sconce or with a cable and plug, both offering different dimming capabilities but still utilising the same iconic form and lighting output. The different mounting solutions give the lamp a versatile quality, making it suitable for corridors and large spaces, as well as a bedside lamp or in a reading nook.
