PRODUCT DESCRIPTION

Designer: Verena Hennig

Normann Copenhagen Reb Lamp LED Pendant

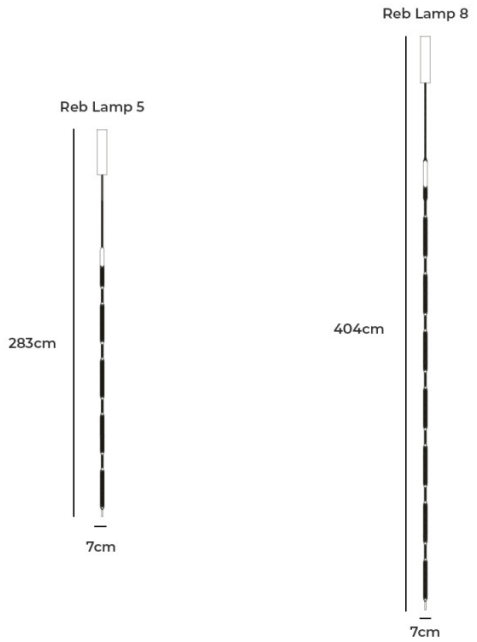

Designed by Verena Hennig for Normann Copenhagen, the Reb Pendant is a sculptural and tactile lighting solution that offers flexibility, functionality and a distinct visual rhythm. Inspired by the Danish word for rope, Reb uses long mesh-covered LED strips that can be freely arranged into various suspended forms, allowing users to draw glowing lines in space. The light is available in two lengths, Reb 5 and Reb 8. Whether forming loops, curves or abstract shapes, Reb becomes both a lighting source and a spatial divider, effortlessly adapting to its surroundings.

Reb's modular design supports bespoke installations, ideal for both residential and commercial interiors. The lighting effect is soft and ambient, with a built-in 3-stage dimmer activated by gently tapping the lower metal tube. Users can cycle through high, medium and low settings to match the mood. Accessories such as the Reb Fixing Rings (set of 5) and Ceiling Loop enable custom hanging options, whether creating cascading spirals or horizontal arrangements. Reb is minimalist yet expressive, ideal for dining rooms, lounges, creative studios or hospitality environments seeking a sculptural centrepiece.

Please note, for further information and pricing on the optional ceiling loop and fixing rings contact us.
