PRODUCT DESCRIPTION

Designer: Chia-Ying Lee

Lodes Random Stick Linear LED Suspension

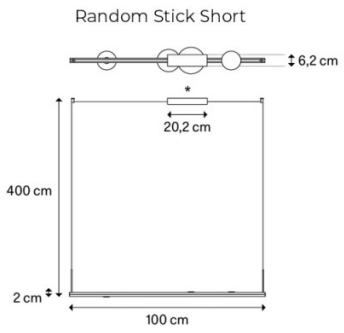

The Random Stick Linear is a highly decorative design created by Chia-Ying Lee that provides a striking aesthetic and charming illumination to any room. This linear suspension offers numerous light sources, with integrated LED's fitted to the underside of the bar, as well as in each of the elegant glass spherical diffusers.

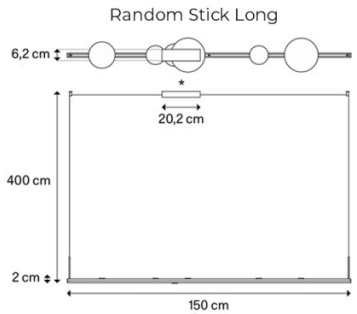

These mouth-blown glass forms appear to delicately balance on the slender form of the Lodes Random Stick, creating an elegant and graceful silhouette, and are available in a range of finishes, which can be mixed in numerous combinations to suit your style or décor. The linear structure is also available in a choice of glossy black, matte white, and glossy gold. The freedom to create multiple lighting effects adds a playful touch to the design and highlights the random aspect of this collection.

Available in two sizes, the short linear holds four diffusers, perfect for displaying over a dining room table or desk. The long linear holds six diffusers, making it well-suited to larger spaces such as over a long cocktail bar or creating a dynamic display in retail settings.
