PRODUCT DESCRIPTION

Designer: Tom Dixon

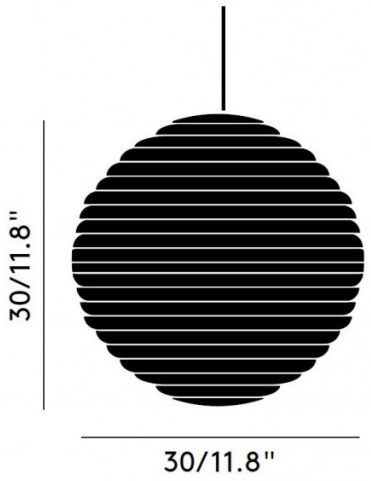

Tom Dixon Press Frosted Sphere LED Pendant

The Press Frosted Sphere Pendant is a new addition to the **Press Collection**, featuring a frosted glass diffuser. Aptly named Sphere, the shape is reminiscent of shipping buoys and children's toys. The heavyweight grooved shade is made from chunky coils of glass, created by pouring molten glass into iron moulds. Using high pressure and high temperatures, the glass is pressed to mould the diffuser.

The ribbed frosted glass refracts and diffuses light from within, projecting a play of light and shadows across the shade. The warm glow created adds ambient lighting to the room, adding a welcoming atmosphere with a decorative element. The Press Frosted Sphere Pendant is an elegant addition to both classic and contemporary interiors, well-suited to communal spaces that require a welcoming ambience, such as an entranceway or dining room. In large spaces, display the Sphere Pendant in clusters with the **Press Frosted Mini Sphere**, creating a unique installation of lights that are as decorative as they are functional.
