PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Press Frosted Mini Sphere Pendant

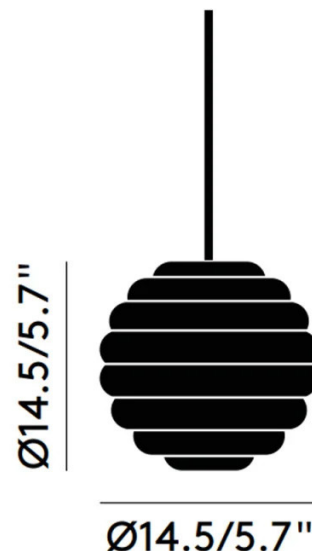

Available to pre-order for official release in September 2025.

The Press Frosted Mini Sphere Pendant is a new addition to Tom Dixon's popular [Press Collection](#) and features a frosted glass diffuser. Like the original, it is created by pouring molten glass into iron frames, which is then pressed into its distinctive form. Named after its spherical shape, the shade is reminiscent of shipping buoys and children's toys.

Housed within the heavyweight grooved sphere is the LED light source. When switched on, the frosted glass gently diffuses light into a warm glow that bathes the shade in light. The glass coils refract light into a mesmerising play of light and shadows. This display is as elegant as it is functional, making the Sphere Mini a suitable addition to living rooms, dining rooms, and stairwells. Display in clusters, at alternating heights, to create a unique installation tailored to your space. In commercial spaces, the Press Frosted Mini Sphere Pendant is perfect for adding ambient lighting and a welcoming atmosphere to both classic and contemporary restaurants.
