PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Press Frosted Mini LED Surface Light

The Press Frosted Mini Surface Light is a new addition to the **Press Collection** by Tom Dixon. Like the original Press, the Press Frosted Mini Surface is made from molten glass, which is pressed into iron moulds, using high pressure and high temperature to mould the diffuser. Each light includes three interchangeable metal caps in gold, silver, or black. This customisable aspect allows the user to alter the light to suit the décor or to create an eye-catching display when mixed and matched with other Mini Surface Lights.

The light source sits in the center of the Press Frosted Mini Surface. The frosted glass gently diffuses light into a warm glow, while the coils refract light to create a play of light and shadows against the surrounding wall. Rated IP55, the Mini Surface is suitable for any room of the home, including bathrooms and wet rooms. Its small structure sits flush to the wall, making it an ideal space-saving lighting solution for smaller rooms. Display on its own, in clusters, or with the **Press Frosted Surface Light** to create a captivating visual display. In commercial spaces, the Press Frosted Mini Surface is well-suited to hospitality settings, adding a welcoming ambience to a modern bar or hotel.
