PRODUCT DESCRIPTION

Designer: Tom Dixon

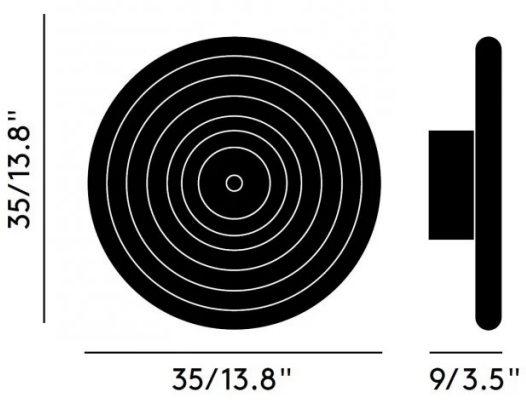

Tom Dixon Press Frosted LED Surface Light

The Press Frosted Surface is a new addition to Tom Dixon's best-selling **Press Collection.** Made from coils of glass pressed in iron moulds, the Press Frosted is designed to last forever. Each shade includes three interchangeable metal caps in gold, silver, or black, allowing the user to customise the lamp to suit any style and décor. With the Press Surface sitting flush to the wall, it can also be used as a space-saving lighting solution for small rooms.

The frosted surface gently diffuses light while the coils of glass catch and refract light, creating a play of light and shadows against the surrounding wall. With an IP rating of 55, the Press Frosted Surface is suited to a wide range of interiors, including bathrooms and wet rooms. Display in rows in a hallway or framing a doorway or bathroom mirror to create a sense of balance. In large rooms or commercial areas, the Press Frosted can be installed in multiples with the **Press Frosted Mini Surface** to create a captivating display that is as decorative as it is functional.
