### PRODUCT DESCRIPTION

#### Astro Minima Pro Round Adjustable LED Recessed Light

The Astro Minima Pro Round Adjustable LED Recessed Light is a minimalistic luminaire that provides direct but glare-free illumination. This recessed light allows you to easily direct the glow to where it is needed most, and the three beam angle options allow you to further personalise the output. Available in either a matt black or matt white finish, the Minima Pro Round Adjustable Recessed Light can adapt to a variety of interiors.

The Astro Minima Pro is equipped with a removable inner bezel, allowing easy access to the driver and electrical connections without the need to remove the entire downlight, effectively preventing accidental damage to the ceiling. Minima Pro Round Adjustable also offers certified fire protection of 30 or 90 minutes when installed in fire-rated solid joist ceilings, and 30 minutes in fire-rated metal web and I-Joist constructions.

**Please Note: The Minima Pro Round Adjustable LED Recessed Light can also be supplied with Dali dimming, and a range of LED filters are also available if required. Please [contact us](#) for more information and pricing.**
