Established and Sons Torch Bunch Suspension

The Torch Bundle Suspension was created by Brussels-based designer Sylvain Willenz. The idea was born after one day in the office. Willenz experimented by bundling a few pendants from the **Torch Collection** together, thinking that they could make an interesting chandelier. The Bundle Cluster is available in two compositions, the S5 and the S10, made up from a collection of five or ten pendants. The S5 is the smaller of the two and was created to suit smaller living spaces. Both compositions are available in three bold finishes: Yellow, Red, and Black. Each pendant is suspended via a fabric-covered cable, which matches the shade's finish.

The Torch Bundle Suspension is made from tactile silicone, referencing the shape and material of a classic handheld torch. A diamond-textured diffuser within the shade references the glass of a car headlight. This diffuser creates glare-free lighting that is guided downwards from each pendant. The bright and functional task-lighting produced is perfect for illuminating a surface below, such as a table or desk. This suspension creates a modern feature, well-suited to bright, contemporary interiors. In commercial spaces, the Torch Bundle Suspension can be used to create an eye-catching display with personality in hotel lobbies or a modern café.
