PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Ringo LED Ceiling Light

Designed by Joan Gaspar, the Marset Ringo LED Ceiling Light plays with transparency, scale, and volume to create a commanding presence in large interior spaces. While the form is simple and geometric, its material expression sets it apart. The shade is made from translucent polycarbonate that resembles solid glass yet appears weightless, filtering light gently through its layered surface. The result is an optical softness that diffuses the LED light source into an ambient glow, ideal for hospitality, public, or contemporary residential projects.

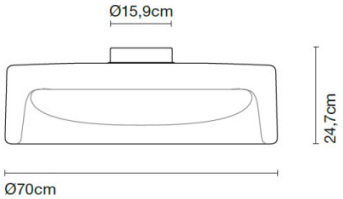

Available in two generous sizes, 70cm and 90cm diameter, and four subtle colour finishes, green, rosé, smoke, and dark smoke, Ringo adapts easily to both bold and restrained schemes. It is equipped with a high-performance integrated LED module and can be dimmed, allowing for tailored control of brightness and mood. Whether switched off or on, the light makes a sculptural statement, a versatile choice for high ceilings, corridors, lobbies, or atriums.

Please note, this product is also available in 3000K & 4000K and Dali dimming variants. Contact us for pricing and information.
