PRODUCT DESCRIPTION

Designer: Ciszak Dalmas

Marset Ambrosia Pro LED Suspension Light

Marset Ambrosia Pro LED Suspension Light brings the Ambrosia collection into more task-led spaces, while keeping the same slim linear language. Designed by Ciszak Dalmas, it takes the soft horizontal form of the wider family and adds a more controlled light output through a cell structure with independent lenses. The result is still visually quiet, but with a clearer sense of purpose.

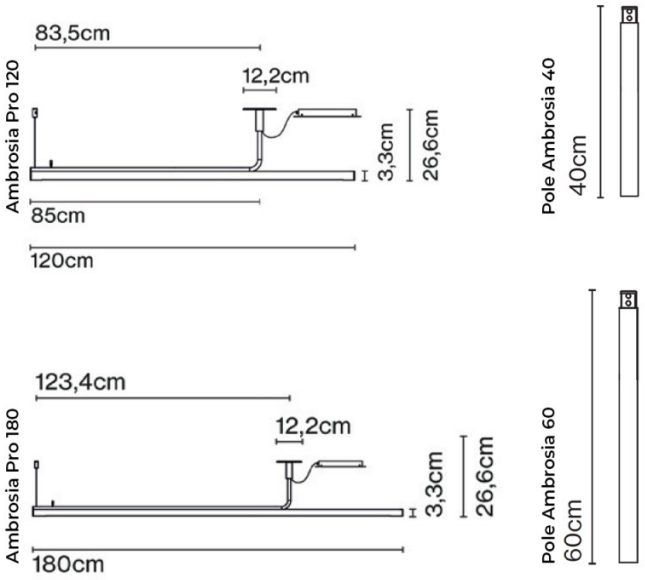

Ambrosia Pro is well-suited to desks, shared worktables, counters, and meeting areas, especially where the light needs to feel focused without making the room look overly technical. The 120cm version works well across smaller work zones, while the 180cm version gives a longer spread over larger tables and open areas. Black has a cleaner, more technical look, while Aluminum and Matte Gold sit closer to the decorative side of the Ambrosia collection.

The black suspension structure gives the Pro version a slightly more technical look than the standard Ambrosia, which suits the way it is used. It works best over desks, meeting tables, counters, and reception areas where the light needs to be directed downwards, but the fitting still needs to sit comfortably within the wider interior.

Please Note: The Marset Ambrosia Pro LED Suspension Light is also available with additional poles, Casambi dimming, and 4000K options. Please contact us for more information and pricing.

PRODUCT SPECIFICATION

Light Source:	**Ambrosia Pro 120:** 34.81W, 3000K, 3072.6 Lumens **Ambrosia Pro 180:** 52.5W, 3000K, 4968.4 Lumens
