PRODUCT DESCRIPTION

Designer: Ciszak Dalmas

Marset Ambrosia Pro LED Suspension

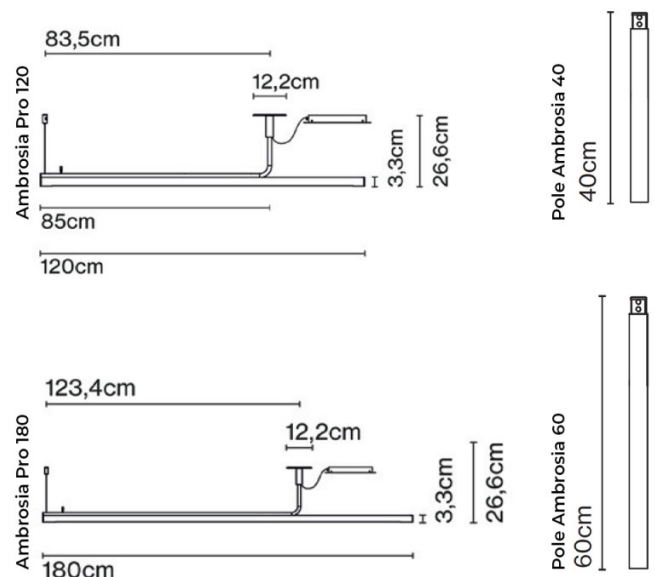

The Marset Ambrosia Pro LED Suspension brings a directional edge to the signature Ambrosia family, originally conceived by Ciszak Dalmas and Joan Gaspar. Designed for workspaces and technical interiors, Ambrosia Pro integrates a modular cell structure with individual lenses, offering focused downlight while preserving the poetic linear form that defines the wider collection. Available in 120cm or 180cm lengths, the luminaire comes with a 60cm black drop rod as standard and can be extended with additional rods to achieve the desired suspension height.

The 120 variant is offered in a clean aluminium finish, while the 180 version is available in matte gold or black. Both sizes support DALI dimming, with optional Casambi integration upon request, and are fitted with powerful 24V LED SMD light sources. 3000K by standard or 4000K upon request, Ambrosia Pro adapts to varied commercial environments, including offices, co-working areas and high-end hospitality. The result is a lighting solution that merges elegance with technical performance in a seamlessly integrated architectural system.

For more information and pricing on additional poles or on Casambi dimming or 4000k options, please [Contact us](#).
