PRODUCT DESCRIPTION

Designer: Stefan Diez

Vibia Plusminus Solo LED Ceiling / Wall Spotlight

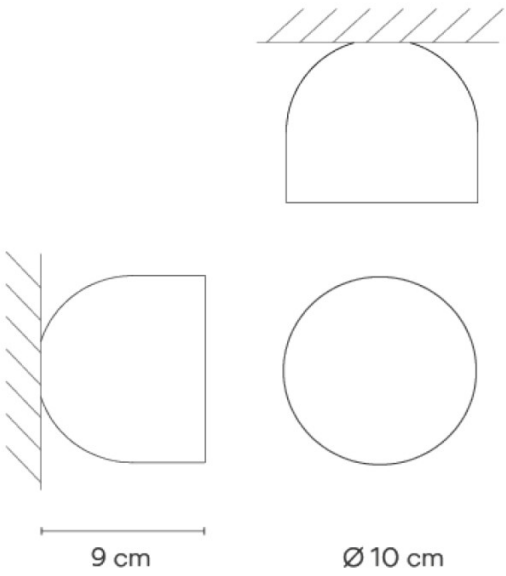

The Vibia Plusminus Solo LED Spotlight expands the award-winning Plusminus collection with a recessed, surface-mounted spotlight tailored for directional, architectural lighting. Designed by Diez Office, this spotlight is available in three beam angles, Narrow, Medium, and Wide, allowing you to shape light precisely to suit your interior. Each unit is built with a durable aluminium body and finished in one of five refined tones: Black, Beige, Terra Red, Blue, or Green. The compact semi-spherical form is visually unobtrusive yet delivers striking, focused illumination ideal for ceilings, wall niches, corridors or transitional areas.

Offering direct accent lighting with full rotational adjustability, the spotlight is equipped with an integrated LED and dimming capability for flexible light control. Its built-in structure tucks neatly into the ceiling, while the micro driver is positioned remotely. Whether used individually to highlight artworks or in clusters to define spatial rhythm, the Plusminus Solo Spotlight exemplifies Vibia's design ethos, minimal, modular, and emotionally attuned to its environment.

Please note, On/Off and Casambi dimming versions as well as 2700K and 3500K versions of this product are available on request, please contact us for further information and pricing.
