PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Pro Trimless LED Downlight

The Astro Downlight Pro collection is a modular product that allows for design flexibility, creating a range of product options that suit your particular project needs. The range allows you to configure different optics, dimming, light temperatures and colour rendering depending on the desired functionality and aesthetic. Designed to bring architectural lighting to residential spaces or for projects that require tailored illumination that is easy to install, the PRO range is a customisable and project-friendly lighting solution.

The Trimless is available as Round Adjustable and Round Fixed IP65 versions. Designed for seamless integration into plasterboard ceilings, its trimless profile eliminates visible edges to create a smooth, continuous surface ideal for contemporary interiors.

To ensure you pick the right product for your space, please get in touch to discuss with us which downlight is best for your needs.

To view the whole range, please use the [Astro Configurator](#).
