PRODUCT DESCRIPTION

Designer: Will Earl

J. Adams & Co Talbot 570 Picture LED Wall Light

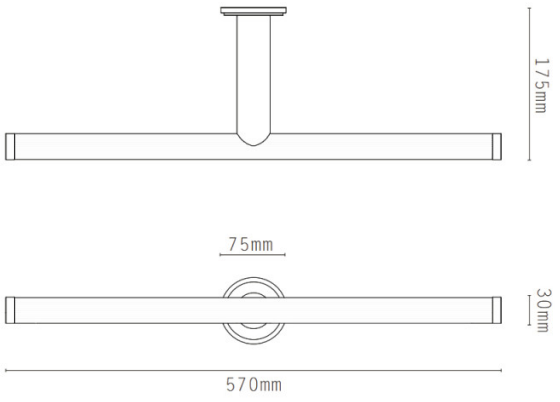

A contemporary reinterpretation of the traditional picture light, the J. Adams & Co Talbot 570 Picture LED Wall Light brings refined form and function to art-focused interiors. Crafted in the UK from reeded brass, it evokes the ambience of old libraries and reading rooms while introducing modern LED performance and exceptional build quality.

Its integrated LED module delivers a warm 2700K glow with a high CRI rating of 90+, making it ideal for illuminating artwork in vivid, true-to-life colour. The design balances minimalism with quiet detail, with a sleek profile and soft projection that draws attention to the subject without distraction. Whether lighting a portrait in a hallway or a collection in a study or gallery wall, the Talbot 570 adds a sense of ceremony to the objects it illuminates.

Available in four elegant finishes, Antique Brass, Bronze, Satin Brass, and Satin Nickel, the Talbot 570 pairs timeless craftsmanship with modern functionality. A supplied driver enables mains phase dimming, while a DALI-compatible option is available for larger systems. Designed by Will Earl and made in England, this is a picture light built to last for generations.
