PRODUCT DESCRIPTION

Designer: Will Earl

J. Adams & Co Spot Switched Wall Light

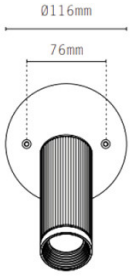

Compact, directional, and beautifully detailed, the Spot Switched Wall Light is a modern reinterpretation of classic task lighting. Designed by Will Earl and handmade in England, it features the collection's signature reeded brass construction and a simple toggle switch on the backplate for direct, fuss-free control.

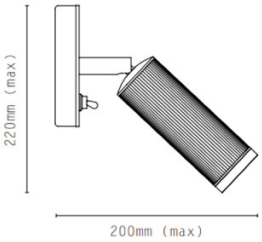

Ideal for use as a bedside reading light or to highlight artwork and alcoves, it offers a blend of elegant form and practical functionality. The supplied LED bulb emits a warm 2700K glow with a focused 36° beam, making it ideal for ambient accents and targeted light. Its compact size and integrated switch make it especially suited to small bedrooms, narrow hallways, or cosy reading corners where space is limited but atmosphere is key.

With four luxurious finishes to choose from, the Spot Switched Wall Light brings detail and quality to spaces that call for character without excess. A tactile, timeless solution for residential and hospitality interiors alike.
