PRODUCT DESCRIPTION

Designer: Finn Juhl

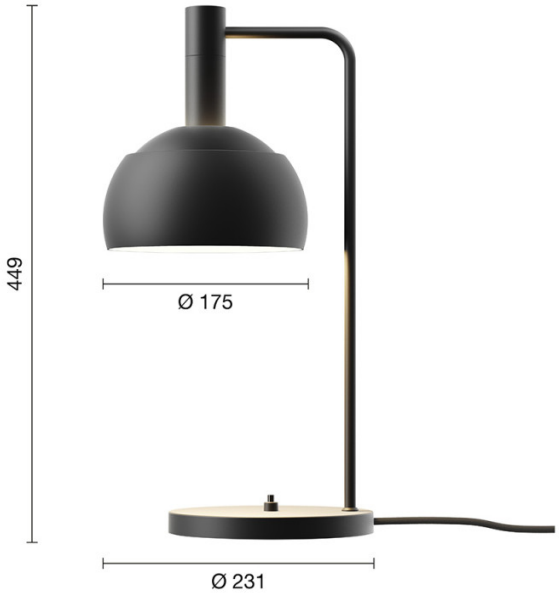

Louis Poulsen FJ Elements Table Lamp

The FJ Elements Table Lamp was originally designed in 1963 by Finn Juhl. In 2013, One Collection reproduced the lamp for an exhibition in Paris. Louis Poulsen is set to reintroduce the lamp in 2025, adding only slight modifications to accommodate a standard E-socket. This new collection includes the original grey colourway as well as two new finishes: White and Black. The minimalistic lamp features a graphical design characterised by geometric shapes and a playful approach to angles.

The FJ Elements Table Lamp produces a downward-directed light, with an opening between the upper shade and the housing creating a subtle upward illumination. Each lamp is provided with a detachable diffuser, which creates a glare-free and pleasant lighting. The lower shade can be rotated, allowing the user to direct light in the direction needed. The FJ Elements Table Lamp is well-suited to modern interiors, with its sleek profile and matt finish adding a contemporary feel to any room. The functional task lighting created by the rotating shade makes the table lamp an ideal lighting solution for an office desk or used as a reading light beside a sofa or at a bedside.

PRODUCT SPECIFICATION

Light Source:	1 x Max 15W E14 (Excluded)
IP Code:	20
Dimming:	Integrated on/off switch on the product.
Dimensions:	Shade: Ø17.5cm Height: 44.9cm Depth: 23.1cm Cable Length: 280cm
