PRODUCT DESCRIPTION

Designer: Anne Dorthe Vester

Pholc Lille 18 Wall Light

A compact yet sculptural ambient lighting solution, the Pholc Lille Wall Light provides warmth for a range of settings. Lille was designed by Anne Dorthe Vester in 2025, who specialises in minimalistic product design, and is shaped by the interaction of light and form. The rounded silhouette is fitted with varying structural layers that diffuse and filter the inner light source, resulting in a glare-free illumination that is an excellent addition to hallways, kitchens and hospitality settings such as cafes, restaurants and bars.

Lille 18 highlights the relationship between light, material and space and is a sculptural wall light with an architectural presence and quiet expression. It is available in 6 finishes, ranging from a softer raw aluminium to a more bold vibrant green or red-orange, depending on your style. Although it can be displayed individually, the Pholc Lille Wall Light really makes a statement when displayed in rows along longer walls.
