PRODUCT DESCRIPTION

Designer: Julien Renault

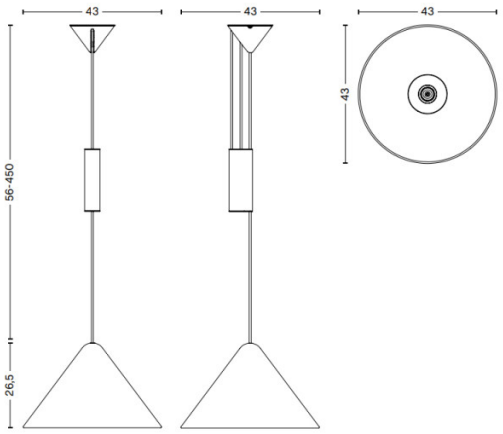

HAY Compass Adjustable Pendant

The HAY Compass Adjustable Pendant introduces a counterweight system that offers precise control over its height, shifting effortlessly from focused task lighting to a more diffuse, ambient glow. Lowered, it provides concentrated illumination for dining, reading, or working. Raised, it expands the atmosphere, creating a softer and more open light ideal for social gatherings, shared meals, or informal settings. This adaptability makes it a versatile solution for both domestic and professional environments where flexibility is key.

Crafted from spun aluminium and robust metal components, the design ensures long-term durability while maintaining a clean, elegant form. Using a standard E27 bulb, the HAY Compass Adjustable Pendant is straightforward to specify, replace, and maintain, keeping it practical as well as refined. Available in a selection of finishes, it pairs seamlessly with the fixed HAY Compass Pendant models, enabling layered lighting schemes across kitchens, workspaces, dining rooms, and hospitality interiors. By combining a timeless silhouette with mechanical precision, the Adjustable Pendant reflects Julien Renault's belief in elevating the everyday and beautifying the ordinary.
