SkLO Twin 1.0 Wall Light

The Twin 1.0 Wall Light was designed by SkLO's in-house team of designers. Specialising in traditional Czech glassblowing techniques, SkLO is renowned for producing elegant and ornamental pieces that convey restraint and beauty. The Twin 1.0 Wall Light is a beautiful example of this philosophy. The design features a two-tone diffuser, created using two glass orbs that are slightly flattened and melded together during the glass-blowing process. The glass diffuser sits on a metal base, held in place by a metal band that sits between the two spheres, an element which is as functional as it is ornamental.

When lit, the glass orbs diffuse light into a warm and gentle glow that bathes the surrounding wall in light. Each sphere holds a light bulb to create an even spread of light. Customisation is at the heart of the Twin 1.0 Wall Light. A wide range of colourways is available for the glass diffusers, as well as a choice of four metal finishes for the base. This allows users to mix and match colourways to create a wall light that perfectly suits their personal style and interior décor. Install the Twin 1.0 Wall Light anywhere that requires a cosy and welcoming ambience, such as a bedroom, sitting room, or reading nook. Display individually or in pairs, framing a doorway to create a sense of balance. It is strongly recommended that the wall light be installed in the vertical position.

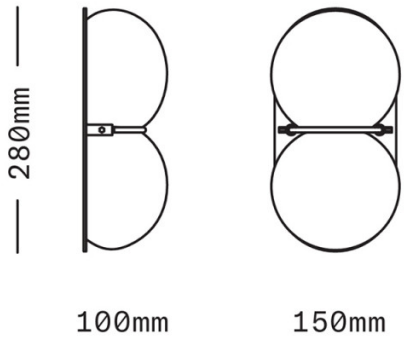

PRODUCT SPECIFICATION

Light Source: 2 x Max 7W G9 LED (Included)

IP Code: 20

Dimming: Dimmable via mains phase dimming.

Dimensions: Height: 28cm
Width: 15cm
Depth: 10cm
