PRODUCT DESCRIPTION

Designer: BEGA

BEGA 84072 Outdoor Bollard

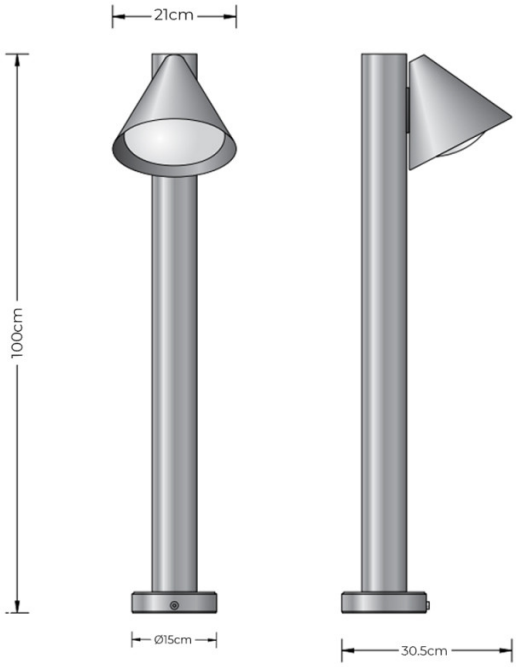

A slender downlighting solution, perfect for pathways, the BEGA 84072 Outdoor Bollard is crafted from copper and a hand-blown, three-ply opal glass diffuser. This durable outdoor bollard is IP44 rated and creates a pleasant ambient illumination, with a conical shade that allows for a wider beam angle. The 84072 Bollard can be used individually or in multiples for more vast areas. This sophisticated lighting solution is an excellent way to brighten up driveways, gardens, patios and decking areas.

The copper structure of the BEGA 84072 Outdoor Bollard will slowly patina over time, due to forming its own protective coating. This means that each bollard will gradually develop its own distinctive character and unique finish.

Please Note: The BEGA 84073 Outdoor Bollard is supplied with a screw on base as standard, but an anchorage unit can also be supplied at an additional cost. Please Contact Us for information and pricing.
