PRODUCT DESCRIPTION

Designer: BEGA

BEGA 77249 LED Bollard

The BEGA 77249 LED Bollard is a perfect solution for pathways and gardens, thanks to its downward-directed illumination that brightens the ground surfaces directly in front of the installation point. BEGA 77249 emits a directed beam with a high degree of luminance and is a useful solution for highlighting potential hazards, for example, on stairs. The IP64 rating ensures that this bollard light can be used in exterior settings and is protected from the elements, whilst the two sleek finish options allow it to adapt to different architectural styles.

As well as style, the BEGA 77249 LED Bollard utilises cost-effective and efficient LED technology, making it a low-maintenance and modern luminaire for your space. A minimalistic choice for both residential and commercial environments, this bollard can be installed individually or in rows for larger settings.

Please Note: The BEGA 77249 Bollard is supplied with a screw on base as standard, but an anchorage unit can also be supplied at an additional cost. Please Contact Us for information and pricing.
