PRODUCT DESCRIPTION

Designer: BEGA

BEGA 77264 LED Bollard

A minimalistic lighting solution for gardens and pathways, the BEGA 77264 LED Bollard provides a downward-directed illumination. The structure of the BEGA 77264 is available in two finishes: either graphite or silver, and boasts curved edges for a softer aesthetic. This contemporary bollard encloses the inner light source with safety glass, ensuring a glare-free light around the surface below.

The integrated LED is cost-effective and efficient, making this lighting solution low-maintenance and perfect for both residential and commercial environments. BEGA 77264 has an IP64 rating, meaning it is protected from the elements and can be fitted in exterior settings, and the cast aluminium frame ensures a durable structure. For this reason, the bollard is an excellent choice for gardens, patios, driveways and walkways.

Please Note: The BEGA 77264 Bollard is supplied with a screw on base as standard, but an anchorage unit can also be supplied at an additional cost. Please Contact Us for information and pricing.
