PRODUCT DESCRIPTION

Designer: BEGA

BEGA 84606 LED Bollard

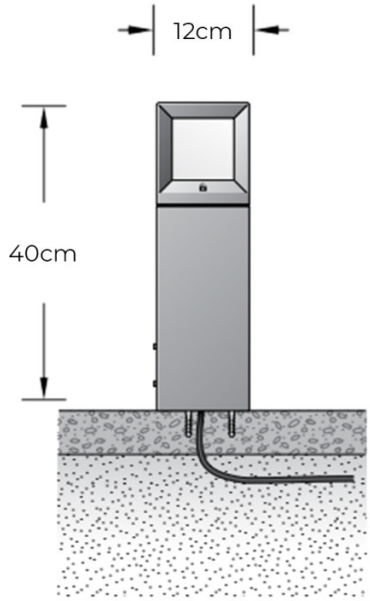

The BEGA 84606 LED Bollard boasts a striking rectangular form and offers an evenly diffused and warm illumination that is filtered through thick-walled crystal glass to prevent glare. Utilising modern LED technology, the BEGA 84606 is durable and cost-effective with an IP65 protection rating, offering functional lighting to gardens and pathways. This bollard can be installed individually or in rows and clusters for larger commercial spaces.

Available in two modern finishes, either graphite or silver, the BEGA 84606 LED Bollard can adapt to a variety of contemporary environments. Both colour options skillfully blend into the architecture, ensuring not to take attention away from other focal points, whilst still ensuring these points and the surrounding location are well-lit.

Please Note: The BEGA 84606 Bollard is supplied with a screw on base as standard, but an anchorage unit can also be supplied at an additional cost. Please Contact Us for information and pricing.
