## PRODUCT DESCRIPTION

**Designer:** Tom Chung

### Muuto Beam Wall Lamp

The Beam Wall Lamp by Tom Chung echoes the form of the contemporary **Beam Table Lamp**. The sleek, durable body is made from extruded and anodised aluminium, while the diffuser is made of opaque polycarbonate. The Beam Wall Light has been designed to bring flexibility to any space. It can be soft or hardwired to suit its environment and users' preferences. With a 345° rotation, light can be directed exactly where needed.

The clean, cylindrical design emits a beam of light from both ends, creating functional direct lighting as well as an ambient glow that bathes the surrounding walls in light. A three-step dimmer allows the user to adjust the intensity of brightness to suit any setting. Display in a reading nook, corridor, or kitchen for a new perspective on modern lighting. In hospitality settings, the Beam Wall Lamp is well-suited to contemporary hotels, framing a bed or lining a hallway, for functional and ambient lighting.
