PRODUCT DESCRIPTION

Designer: BEGA

BEGA 84176 LED Bollard

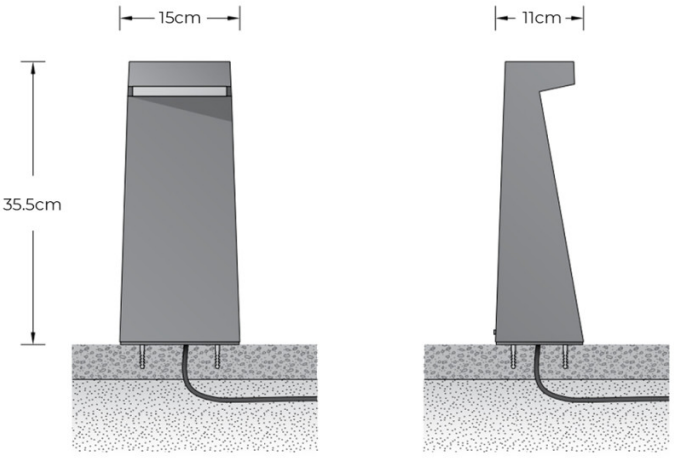

The BEGA 84176 LED Bollard is a compact lighting solution, fit for exterior settings, thanks to the IP65 rating. Perfect for footpaths and terraces in private gardens, and house entrances, this bollard light produces a focused downlight onto the surface below, emitting less than 1% of light into the upper half-space of the fitting, whilst also adding a contemporary aesthetic to your space. Similarly, the BEGA 84176 can be used in commercial settings such as building entrances, public footpaths and outdoor settings in restaurants and bars.

The 84176 Bollard by BEGA is cost-effective, thanks to the high-quality integrated LED light source, which not only provides a warm, glare-free glow but also makes the fitting low-maintenance. This luminaire is also durable, due to the cast aluminium structure and protective glass, ensuring it is protected against the elements. The BEGA 84176 LED Bollard is available in two modern finishes: either graphite or silver.

Please Note: The BEGA 84176 LED Bollard is supplied with a screw on base as standard, but an anchorage unit can also be supplied at an additional cost. Please Contact Us for information and pricing.
