PRODUCT DESCRIPTION

Designer: BEGA

BEGA 51258 LED Wall Light

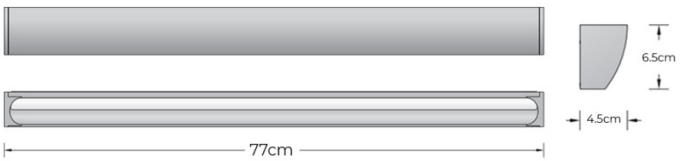

The BEGA 51258 Wall Light is an unobtrusive lamp that projects indirect illumination onto the wall above, filtering it through a silicone diffuser to reduce glare. It is available in three modern finishes: black, brass or white, allowing the wall light to adapt to a range of interiors and personal styles. The BEGA 51258 also features a high colour rendering index and comes equipped with DALI-controllable power supply units, allowing you to easily control the intensity of the lighting output.

This sleek wall light is an excellent addition to hallways and longer corridors due to its design length and small overhang. The BEGA 51258 LED Wall Lights add a touch of contemporary style to residential and commercial spaces and can be displayed individually or grouped together to form elongated linear rows.

The BEGA 51258 LED Wall Light can also be supplied in two longer lengths and with a dual emission lighting output. Please contact us for more information and pricing.
