PRODUCT DESCRIPTION

Designer: BEGA

BEGA 84239 LED Outdoor Bollard

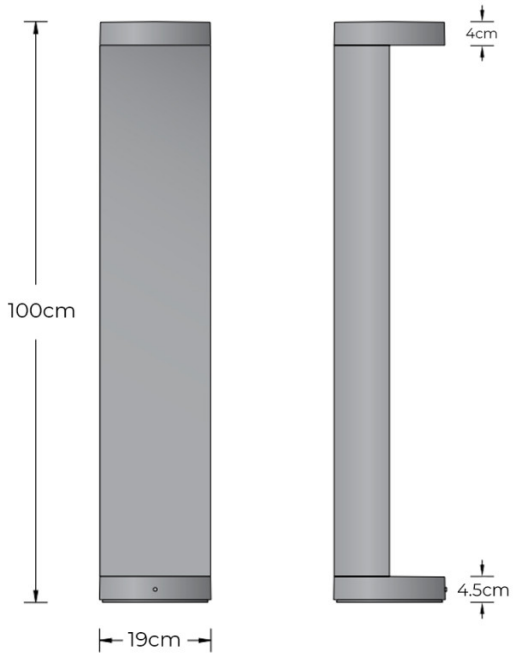

A larger version of the **77264**, the BEGA 84239 LED Outdoor Bollard pairs architectural design with LED technology. The LED light source is projected downwards onto the surface below and is effectively shielded above the horizontal plane. The result is a high degree of illumination in the near field with reduced glare potential, offering exceptional visual comfort.

The BEGA 84239 Bollard is available in two contemporary finishes, graphite or silver. Both of which can adapt seamlessly to a range of environments and can be installed individually, in pairs or in longer rows for paths and walkways. The slender silhouette and curved detailing add an elegant aesthetic to both residential and commercial settings.

Please Note: The BEGA 84239 Bollard is supplied with a screw on base as standard, but an anchorage unit can also be supplied at an additional cost. Please Contact Us for information and pricing.
