PRODUCT DESCRIPTION

Designer: BEGA

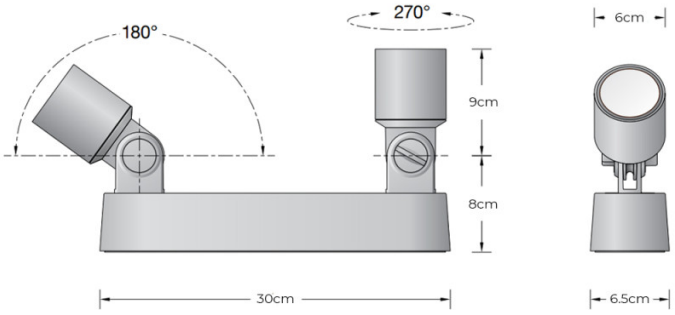

BEGA 84580 LED Spotlight

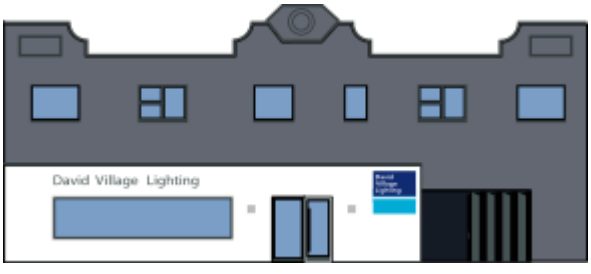

Featuring two independently adjustable light sources on a single cross beam, the BEGA 84580 LED Spotlight is ideal for areas where floodlighting and eye-catching lighting effects are required. Thanks to the IP65 rating, this lighting solution can be used on the exterior of buildings, both ceilings and walls, providing direct illumination for al fresco dining areas, patios and architectural features. The sleek graphite finish allows the BEGA 84580 to adapt to a range of contemporary settings without taking away from any decorative features.

Each light source of the BEGA 84580 LED Spotlight can be rotated 270° and angled 180°, offering optimal functionality. The cast aluminium structure is durable and the safety glass not only protects the inner LED light source but also ensures a more even dispersion of light, and a prevention of glare.
