PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Whirl LED Surface Light

The Tom Dixon Whirl Surface Light has been crafted to intrigue. Inspired by the distorted patterns of Optical Art, the Whirl features a hypnotic spiral shade that is designed to dazzle. While the shade looks decorative when off or on, a sense of life is brought to the piece when it's illuminated. The spiral design transforms light, reflecting it into an ever-changing myriad of abstract patterns. The coloured shade softens light and produces a warm and cosy ambience, perfect for creating a relaxing atmosphere.

Each piece is crafted in a state-of-the-art factory in Germany. The lightweight yet durable shade is created using the same injection blow moulding process that is synonymous with all of Tom Dixon's polycarbonate shades. A semi-metallised finish is produced from the vacuum metallisation process, which sees a thin layer of metal deposited on the interior of the shade. This metallic finish is available in silver, copper or gold, complementing the lamp's decorative design. Its small, unimposing structure makes the Whirl Surface Light an ideal space-saving lighting solution for a wide range of interiors, regardless of size. With the option to install on a wall or ceiling, the Whirl Surface Light is perfect for adding ambient lighting to a bedroom or dining room, or installed in multiples, running the length of a hallway, to create a soft and even glow.

Please Note: A Dichroic filter is also available for this product. Reflecting a mix of colours throughout the shade for a more iridescent lighting effect. Contact us for pricing and information.

PRODUCT SPECIFICATION

Light Source: 6W, 3000K, 800 Lumens

IP Code: 20

Dimming: Dimmable using leading edge and trailing edge.

Dimensions: Height: 30cm
Width: 30cm
Length: 28.8cm
