PRODUCT DESCRIPTION

Designer: Tom Dixon

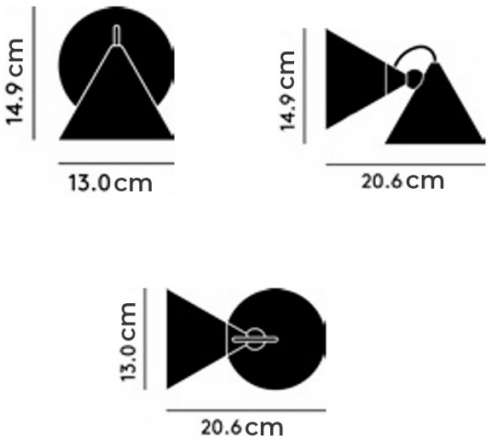

Tom Dixon Pose LED Surface Lamp

The Pose Surface Lamp, designed by Tom Dixon, is inspired by the world of optical physics. The versatile lamp features a bold and impactful profile, which adds a strong personality to any space. Two conical forms are joined by a custom ball joint, allowing the shade to be moved for adjustable directional lighting. The Pose Surface Light is made from injection-moulded ABS/PC and is available in three eye-catching finishes: Putty, Kelp, and Silver.

The Pose Surface Lamp features a Fresnel lens that, when illuminated, focuses light into a magnified beam. This sharp beam of light is perfect for use as a task light above a desk or as a reading light at a bedside. Alternatively, use the Pose Surface as a spotlight to highlight art on a gallery wall. The poseable nature of the surface lamp adds versatility, allowing users to adjust the direction of light as required. Display with the **Pose Table Lamp** to create a cohesive installation that is designed to add personality and a touch of humour to any space.
