## PRODUCT DESCRIPTION

**Designer:** Tom Dixon

### Tom Dixon Pose LED Pendant

The Pose Pendant is the latest addition to Tom Dixon's Pose Collection. The Pose is a series of lights inspired by conical shapes and the world of optical physics. The pendant features a conical shade, a form that is utilised throughout the collection to add a personality, along with a touch of humour. A magnetic sphere allows the shade to be adjusted to precisely angle light where required. The shade is spun from mild steel and is available in three bold finishes: Kelp, Putty, and Silver.

The Pose Pendant has been created as a highly versatile lighting solution. When illuminated, the Fresnel lens magnifies and focuses light, creating a sharp beam. The moveability of the shade allows users to direct light into a downlight, backlight, or use it to illuminate a specific object as required. Available in two sizes, 25cm or 43cm, the Pose Pendant can be installed individually above a dining table or in rows to run the length of a long kitchen island. The versatile nature of the Pose allows it to blend seamlessly into various settings in both domestic and commercial environments.

## PRODUCT SPECIFICATION
